

SunSmile® Fruit & Vegetable Rinse

Made from all natural ingredients (based on too much oxygen) and is used to:

- **Clean fruits and vegetables**
- **Clean meats and fish**
- **Get rid of bacteria**
- **Rinse away pesticides**
- **Get rid of parasites and their eggs**
- **Remove waxy coatings**
- **Remove general fungus**
- **Disinfect kitchens and bathrooms**
- **Get rid of bed mites**
- **Get rid of slugs in the garden**
- **Spray plants**
- **Get rid of ants**

There really is no product equal to SunSmile® Fruit & Vegetable Rinse. We use naturally-derived ingredients to clean fruit and vegetables of herbicides, pesticides, fungicides, dirt, waxy coatings, oily substances and other undesirable substances. The primary cleansing agent is decyl polyglucose, a biodegradable surfactant derived from corn starch and coconut oil.

Instructions: Mix 1 inner capful of SunSmile® Fruit & Vegetable Rinse in one gallon / 3.75 liters of water. For fruit and vegetables, dip in diluted solution for 1 minute. Pat dry or use straight out of the solution. For waxy coatings, dip fruit and vegetables in diluted solution for 5 minutes and wipe dry.
